

BallaSTAR®

Light-level switching offers versatility, convenience, and savings

Now you can save energy and shift lighting moods quickly with the flip of a switch. Ballastar® ballasts from Universal Lighting let you easily switch light levels from 100% to 50% or 100%/ 60%/30% using standard wall switches or relays. You get full illumination in the fixture while dimming, which means no dark spots and shadows in the luminaire or the space illuminated.

Ballastar highlights include:

- Can be incorporated into building management systems
- Wires the same as inboard/outboard lighting fixtures (two “hot” leads for switching control)
- Complies with energy code requirements for switching, including ASHRAE 90.1 and California Title 24
- Compatible with occupancy sensors

Bring new creativity to business and institutional lighting.

Ballastar® ballasts are ideal for a wide variety of applications, including schools and offices.

Lighting designers have greater flexibility thanks to Ballastar's low profile case and ballast factor options (both .95 and 1.15 for T5 and .88 for T8).

Universal's T5 Ballastar models deliver exceptional energy savings: up to 8% greater efficiency than standard T5 ballasts.

Features & Benefits

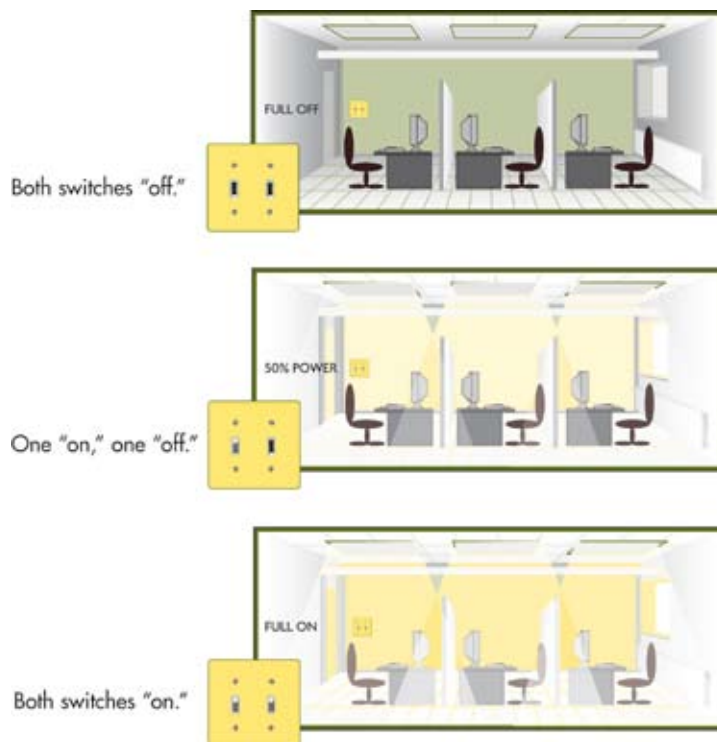

- Controlled by standard wall switches or relays
- Meets energy code switching requirements, including ASHRAE 90.1 and California Title 24
- Even illumination in the fixture while dimming—no dark spots or shadows
- Uses two "hot" leads for switching control—wires just like inboard/outboard fixtures

T5 Features:

- High efficiency 2-lamp models (.95 and 1.15 ballast factor)
- Ideal for high efficiency T5 fixtures
- Switches from 100% to 50% power range
- Installer-friendly universal input voltage (120–277 volts)

T8 Features:

- 1-, 2- and 3-lamp F32T8 options
- 100%/50% and 100%/60%/30% switching options

We're Your Proactive Partner

For more than half a century, Universal Lighting has been the leader in control systems for linear fluorescent, compact fluorescent and HID systems. Call us today to learn more about how Ballastar can enhance lighting creativity and lower costs.
