

8/2/11

RoHS Compliance Verification Statement

Universal Lighting Technologies is among the members of the NEMA voluntary call to action for RoHS compliance. This voluntary action is an open recognition to move forward with RoHS standards even without legislation pushing the conversion.

RoHS is the restriction of the use of certain hazardous substances (RoHS) in electrical and electronic equipment. The restricted substances are Lead, Mercury, Cadmium, Hexavalent Chromium, Polybrominated Diphenyl, or Polybrominated Diphenyl Ethers.

This letter certifies to the best of our knowledge that all product lines listed below comply with the RoHS standards as of **8/2/11**.

This list will be continually updated as qualifying line conversions are completed.

- Electronic High Intensity Discharge Ballasts (eHID)
- Lampholders
- VS-Branded Electronic and Magnetic Ballasts (For all Lamps)
- VS-Branded Igniters
- VS-Branded Capacitors
- VS-Branded Drivers
- ULT is transitioning Linear Fluorescent Ballast Families – please contact ULT for more information. We will release information once **Full** families are converted.

Sincerely:

Chris Holstein
