FOR IMMEDIATE RELEASE

Universal Lighting Technologies Introduces New Triad® T8 Super Low Profile Electronic Fluorescent Ballasts

NASHVILLE, Tenn. (June 03, 2002) – Universal Lighting Technologies' Triad® T5/HO high-efficiency electronic ballasts are designed for operating T5 and T5/HO lamps ranging from 14 to 54 watts. Triad® T5 and T5/HO applications include indirect, pendant mount, wall and surface mount, cove, undercabinet, and task lighting.

Features and benefits of Universal Lighting's Triad® T5 and T5/HO ballasts include:

- Small cross-sectional area and low profile height of 1.0_ for flexible fixture design;
- Installer-friendly universal input voltage (108 – 305 volts) to reduce inventory requirements;
- End-of-lamp-life shutdown circuit with auto reset when replacing lamps;
- Programmed Rapid Start technology for maximum lamp life;
- Less than 10 percent total harmonic distortion (THD);
- Plug-in lead connectors for easy installation; and
- Models are also available for 347-volt applications.

"Taking advantage of the ballasts' extremely compact size allows flexibility for lighting designers and fixture manufacturers to produce smaller, more optically efficient luminaries in a variety of applications," said Peter Revesz, product manager of electronic products. "With its low profile height and small cross section, the Triad® T5/HO ballast and lamp combination is ideal for specialty architectural lighting applications."

For more information about the Triad® T5 and T5/HO ballast family, fax your request to (615) 316-5146 or visit the Web site at www.universalballast.com.
