FOR IMMEDIATE RELEASE

Universal Lighting Technologies Introduces ULTim5® Ballasts

NASHVILLE, Tenn. (May 6, 2003) – Universal Lighting Technologies introduces the ULTim5® line of T5HO ballasts—the maximum energy-saving solution for traditional HID lighting applications.

These ULTim5® ballasts are lightweight and feature a small cross section that allows the ballasts to be incorporated easily into fixture applications never before possible. These ballasts are designed for 1- to 4-lamp applications and provide end-of-lamp-life shutdown circuitry for safe operation. Both universal (120-277 volts) and high range (347–480 volts) input voltage ballasts are available to meet all application requirement needs.

The ULTim5® T5HO ballasts are ideal for new construction and retrofits in gymnasiums, high bay retail stores and other applications.

For more information about lighting ballasts and controls, fax your request to (615) 316-5146 or visit the Web site at www.universalballast.com.

For nearly six decades, Universal Lighting Technologies, Inc., has been bringing power and precision to the world's most innovative lighting. Headquartered in Nashville, Tenn., with operations and distribution worldwide, the products of Universal Lighting Technologies are marketed under the Universal® and Triad® brand names. Universal Lighting Technologies is focused on designing, manufacturing and distributing the industry's finest lighting ballasts and controls. Universal Lighting Technologies —*The Power to Light. The Power to Lead.*
