FOR IMMEDIATE RELEASE

Universal Lighting Technologies New ULTim8' Product Literature

NASHVILLE, Tenn. (December 15, 2005) – Universal Lighting Technologies, a leading manufacturer of lighting ballasts and controls, introduced a new product flier highlighting the ULTim8' ballasts.

The ULTimate in energy savings, the new ULTim8' product literature provides easy-to-understand specification information, catalog numbers, wiring diagrams and appropriate lamp applications.

Universal Lighting's new ULTim8' high efficiency ballast family is the biggest energy-saving breakthrough in linear fluorescent lighting in a quarter century. The new and improved ULTim8® family provides up to eight percent energy savings over standard electronic ballasts, and even more when operated with new, energy-saving 30-watt T8 lamps. The ULTim8® product line offers dramatic energy savings with universal input voltage and a low profile package.

For more information on Universal Lighting's new product literature, call 1-800-BALLAST, fax your request to (615) 316-5146, or visit the Web site at www.universalballast.com.

For nearly six decades, Universal Lighting Technologies, Inc., has been bringing power and precision to the world's most innovative lighting. Headquartered in Nashville, Tenn., with operations and distribution worldwide, the products of Universal Lighting Technologies are marketed under the Universal® and Triad® brand names. Universal Lighting Technologies is focused on designing, manufacturing and distributing the industry's finest lighting ballasts and controls. Universal Lighting Technologies —*The Power to Light. The Power to Lead.*
